

An important note from your Membership Chairman.

Once a year we all get together to renew our passion for the Skies. It's that time again next month when we gather to learn what we have done over the past year, and what is new and exciting for this next year. You really don't want to miss this.

The Aero Club of Southern California is 110 years old, and we, your Board of Directors are proud of what has been accomplished over the years. Some of the brightest and most interesting persons in space and aviation are here to share their knowledge and stories with you our members and guests.

This official meeting is about coming together to elect board members, AND with openings on the BOD, we are also looking for additional persons interested in taking part. If you have an interest in learning more about what we do, please contact me for more information. We are looking for like-minded persons that enjoy the company and knowledge of others both in the industry and fans, like myself.

I'm also very excited to announce our guest speaker. Jim Payne, Chief Pilot of the "Perlan II". Jim currently owns the world record of piloting a sailplane to heights over 76,000 feet. You may read more of Jim's info at this link. <http://www.perlanproject.org/member/jim-payne>

Respectfully,

George G. Butts
2nd V.P. & Membership Chair
